can you explain to me how each step of this assembly code works

Of course! Please provide the assembly code you'd like me to explain, and I'll break down each step for you.

```
increment(int):  
    push    rbp  
    mov     rbp, rsp  
    mov     DWORD PTR [rbp-4], edi  
    add     DWORD PTR [rbp-4], 1  
    mov     eax, DWORD PTR [rbp-4]  
    pop     rbp  
    ret
